PROFESSIONAL EXPERIENCE

Fils project, Full stack developer ☑ 2023 - present | (Remote), Spain

- Fils connects people through microblogging and social networking. It can accommodate up to 10,000 active users.
- It is implemented using Next.js with React for both frontend and backend. It utilizes MongoDB with Mongoose for scalable data management, Zod for data integrity, Clerk for streamlined authentication, and Shadcn/ui, Tailwind, and CSS to enhance the interface.
- Coded with TypeScript and tested with Playwright, it ensures project quality and reliability.
- **User experience** remains a priority throughout the project.

Aulart Masterclass SL, Content Creation, Social Media & Support ☑ 2020 - 2022 | (Remote), Spain

- Educational content creation of technical music production topics (Design, video editing, and copywriting of social media assets and blog articles).
- Planning, scheduling, and posting organization on social media platforms and blogs.
- Management of external content creators.
- Customer service and advice on Aulart products, and technical support communication.
- Regular reports on the level of satisfaction of our users to the rest of the team.
