💼 PROFESSIONAL EXPERIENCE

Fils project,
Full stack developer ⌗
2023 - present │ (Remote), Spain

- Fils connects people through microblogging and social networking. It **accommodates up to 10,000 active users and 100 active organizations.**

- It is implemented using **Next.js** with **React** for both frontend and backend. It utilizes **MongoDB with Mongoose** for scalable data management, Zod for data integrity, Clerk for streamlined authentication, and Shadcn/ui, Tailwind, and CSS to enhance the interface.

- Coded with **TypeScript** and tested with **Playwright**, it ensures project quality and reliability.

- **User experience** remains a priority throughout the project.

Aulart Masterclass SL, *Content Creation, Social Media & Support* ⌗
2020 - 2022 │ (Remote), Spain

- Educational content creation of technical music production topics (**Design**, **video** editing, and **copy-writing** of social media assets and blog articles).

- Planning, scheduling, and posting **organization** on social media platforms and blogs.

- **Management** of external content creators.

- Customer service and advice on Aulart products, and technical support communication.

- Regular reports on the level of satisfaction of our users to the rest of the team.
